Bus Facility for Girl's

Brief report of Facility:-

Buses are the most preferred and frequently used transportation system of commute for the students. The reason being the safety. Along with the safety benefits, there are various other factors to which buses contribute. The most important benefits of using buses for college girls. Bus management thoroughly tests and analyzes drivers keeping the safety factors in mind. The drivers are licensed, experienced, and do not hold any road rash case in the past. These skilled drivers add to the safety of buses. So, college bus transportation is the best option to choose by parents for their girls. As buses are the safest way to commute for girls, the parents can stay relaxed without worrying about the security of their girl. The buses pick up students with wasting time in waiting. Every student knows the time of the arrival of the bus at their stoppage. It means they don't need to spend their time waiting for buses' arrival before time.

For young girls in villages, education is a luxury. But most of them are forced to discontinue their studies even before completing secondary education. Many girl's want to pursue higher education but due to poor transport facilities, non-availability of transport, shortage of buses etc. Girls are deprived of education. At the same time, girls face harassment while using public transport, along with the fear of physical attack; parents stop their girl's education in rural areas. Therefore if facilities are available for girls to go to college, girls will not be deprived of higher education and parents will not be afraid of their daughter's insecurity and parents will not be indifferent to girls higher education.

Bhanudasrao Chavan College, Lohara run by Marathwada Shikshan Prasarak Mandal, is unique in that a special Bus facility has been provided for girls to come and go to the college.

Due to the fact that the girls are in rural areas there is a problem of transportation in order to reach the college in time. The college has provided a special bus facility for the girl's. Girls have been provided bus facility from their village to the college campus and from the college campus to the village.

This bus facility was kept free for girls from 2016 to 2020, after that from 2021-22 bus facility is being provided by charging some fee due to this facility, there are more girls than boys in the college.
